Your reviews already say why it comes back.

An open Google model on an AMD GPU reads every review of a product, finds the fit and quality problems behind returns, and writes the fix for the listing.

THE PROBLEM

One in four online clothing orders comes back. Fit is the top reason.

ONLINE APPAREL RETURN RATE

24%

Coresight Research, 2023

RETURNS FOR SIZE OR FIT

53%

ahead of colour (16%) and damage (10%)

REVIEWS PER PRODUCT

300+

the reasons are written down; nobody reads them all

THE PRODUCT · DRESS #921642

Small size, tight fit

Runs small: most customers size up one.

ADD TO THE LISTING

This style fits closely, especially in the chest and rib cage areas. Consider sizing up for a more comfortable fit.

Photo to add: Photo showing the garment fitted on a model, with measurements of chest and rib cage circumference clearly labeled.

GEMMA VS THE RENTERS THEMSELVES

Runs small: 78% · renters said 39%

Runs large: 5% · renters said 1%

from 60 of 307 reviews; the renter label covers all of them

PROOF · HELD-OUT DATA, ONE RUN

Checked against what renters said themselves.

METHOD	MACRO-F1	ACCURACY	RANKS “RUNS SMALL”	RANKS “RUNS LARGE”
Gemma 3 12B on AMD	0.73	0.72	0.73	0.78
Keyword rules	0.61	0.61	0.64	0.73

Rent the Runway: 900 reviews balanced across fit / small / large; 40 products, Spearman vs each product's true share over all its reviews. Prompt tuned on a separate dev set.

AMD

The whole pipeline runs on one AMD GPU.

HARDWARE

AMD Radeon Pro W7900D

REVIEWS READ ON AMD

3,300

1.30 reviews / s, batched bf16

MODEL

Gemma 3 12B

open weights; reviews never leave the seller's GPU

BUSINESS VALUE

A size note costs nothing. A return costs $10–20 to handle.

WHO

Fashion sellers and rental shops with hundreds of reviews per item

WHAT THEY GET

Which items run small or large, why else they come back, and the exact text and photo to add

WHY OPEN + AMD

Customer text stays on the seller's own GPU; one card handles a catalogue overnight

HOW IT WORKS · NEXT

Read, count, write. Then plug into the store.

01 READ

Gemma returns fit, causes, quote and fix for every review

02 COUNT

Shares are counted in code, so the model cannot inflate a problem

03 WRITE

A second pass sees only counts and real quotes and writes the fix

Next: vLLM serving on AMD Instinct, Shopify and marketplace review imports, A/B test of the size note against the return rate.
